Summary

Computer Science graduate with hands-on experience in AI-driven surveillance, Android development, and ML deployment. Skilled in YOLO, TensorFlow, and Firebase, with a proven track record of developing real-world AI systems for surveillance and automation. Seeking AI/software engineering roles to build scalable, impactful solutions.

Education

Bachelor of Computer Science, **FAST NUCES LAHORE** Aug. 2021 - July 2025

Relevant Coursework: Programming Fundamentals, Object-Oriented Programming, Data Structures & Algorithms, Operating Systems, Database Systems, Computer Networks, Artificial Intelligence, Machine Learning, Computer Vision, Data Science

Experience

- AI/ML Internship – [Vanar](#)** Aug. 2025 - Oct 2025
Worked on web development and developed a RAG-based chatbot to enable context-aware responses using LLMs. Contributed to AI/ML projects and gained hands-on experience in model building and deployment. Also collaborated on live projects with the team
- FYP Collaboration – PSCA Lahore** Nov 2024 - Jan 2025
Developed and tested an AI-powered litter detection system in collaboration with PSCA, integrating YOLO-based object detection and ANPR for real-time offender tracking through surveillance cameras.
- AI/ML Intern at [ITSOLERA](#)** July 2024 - Sep 2024
Contributed to AI/ML projects, including a fake news detector and earthquake detection system, applying TensorFlow and PyTorch for model training and evaluation, improving classification accuracy and data handling workflows.

Skills

Programming:	Python, Java, C/C++, HTML/CSS, SvelteKit, Tailwind
Frameworks / Libraries	TensorFlow, PyTorch, scikit-learn, NumPy, OpenCV, REST API, Fast API.
Tools & Platforms	Android Studio, VS Code, Jupyter Notebook, N8N, LangChain, Docker
Databases/Cloud:	PostgreSQL, MongoDB, Firebase, MySQL

Project

- Sales Pitch Generator** AI Project SvelteKit, FastAPI, Gemini AI
Built an AI platform that automatically generates sales pitch presentations using RAG and Gemini AI for contextual content generation.
- [myNeutron AI memory](#)** Semantic AI Memory Chrome Extension
Worked on feature development for *myNeutron* — an AI Chrome extension that provides semantic memory integration with ChatGPT, Gemini, and email. Contributed to building semantic search, data capture, and Chrome integration features.
- Litter Detection System** Computer Vision, YOLO, ANPR
Developed an AI-based system to detect littering vehicles using YOLO and license plate recognition, enabling real-time offender identification from surveillance footage.
- [Authentication App With ChatBot](#)** SvelteKit, PostgreSQL, RAG
Built a chatbot web app with editable prompts, branching conversation history, OAuth login, and admin controls. Integrated RAG (Retrieval-Augmented Generation) for context-aware responses, enabling dynamic knowledge retrieval from stored conversation history.
- [Flex-Break](#)** Information Security
Enhanced university portal with GPA/CGPA calculator and quick access features; discovered and reported a critical login vulnerability.
- [Codefest](#)** Java, MongoDB
Developed a desktop app for coding competitions where users can create/join contests, post practice questions, and earn leaderboard points.
- Academic Projects Portfolio** C/C++, Assembly8088, MySQL, Java.
Developed a variety of projects, including a Donation Management System and games like Car Racing (Assembly8088), Minesweeper, and Candy Crush Clone (C++). These projects demonstrate hands-on experience in database systems, object-oriented programming, low-level coding, and UI/UX design.

Extracurricular Activities

- Vice President, ACM NUCES Lahore – Organized workshops and competitions to promote coding culture.
- Head, App Development Competition – SOFTEC 2024 – Led team to design and execute flagship competition.
